

“Helping people achieve their travel dreams”

Press statement for Immediate Release

October 2014

Medical Travel Companions (MTC) creates independence and provides qualified companions for people who love to travel but require a companion for assistance, when a family member or friend is unable to assist. This could be a simple trip or a complex domestic or international journey. We recognise that there are a large number of people internationally who choose not to travel due to a variety of personal circumstances. MTC can remove this barrier and allow such people to realise their independence and travel dreams.

Our qualified, professional travel companions provide friendly, caring assistance and peace of mind to a variety of travellers including the elderly, disabled, those with a medical condition, children, groups or people recovering from surgery or injury.

MTC director, Ben Wilson was interviewed recently for Sky News in regards to the services offered as can be seen online: http://youtu.be/xy9V_8yNEAgI

This is a topical news story as international governments are trying to keep the aged care sector in home and independent for as long as possible. As you may be aware the aged care sector makes up 14% of the population and is set to increase by 25% by the year 2050.

MTC does NOT administer medications and does not take any clinical responsibility and is a companion service only. It is all about improving people's lifestyle and independence with the assistance from qualified, professional companions. All requests should be submitted through the website www.medicaltravelcompanions.com.au or by calling Managing Director Ben Wilson on 0419 038 555 for a fast and effective response.
